VIKING ENERGY GROUP, INC.
Notes to Consolidated Financial Statements
(Unaudited)
(Amounts expressed in US dollars)

Note 1 Nature of Business and Going Concern

Viking Energy Group, Inc. (“Viking” or the “Company”) was incorporated under the laws of the State of Florida on May 3, 1989, as Sparta Ventures Corp. and remained inactive until June 27, 1998. After several name changes, the Company merged with and into a wholly-owned subsidiary, SinoCubate, Inc., which remained the surviving entity of the merger. SinoCubate, Inc. was formed in the State of Nevada on September 11, 2008. The merger resulted in a change of name of the Company from Synthenol Inc. to SinoCubate, Inc., and a change in the state of incorporation of the Company from Florida to Nevada. On June 13, 2012, the Company changed its name to Viking Investments Group, Inc., and the Company’s ticker symbol was changed to “VKIN.” On March 17, 2017, the Company changed its name to Viking Energy Group, Inc.

The Company's business plan is to engage in the acquisition, exploration, development and production of oil and natural gas properties, both individually and through collaborative partnerships with other companies in this field of endeavor. On March 8, 2016, the Company incorporated a wholly owned subsidiary, Viking Oil & Gas (Canada) ULC, in Alberta, Canada, to hold its Canadian oil and gas interests. In November of 2014, the Company entered into its first contract relative to oil and gas activities involving jointly controlled assets and related liabilities by purchasing an undivided 50% interest in the Joffre project located in Alberta, Canada. On February 23, 2016, the Company closed on the acquisition of working interests in four leases with access to the mineral rights (oil and gas) concerning approximately 281 acres of property in Miami and Franklin Counties in eastern Kansas. On August 30, 2016, the Company incorporated an additional wholly owned subsidiary, Mid-Con Petroleum, LLC (“Mid-Con”), in the State of Kansas to hold its current acquisitions in the central United States. On October 4, 2016, the Company, through Mid-Con, completed an acquisition whereby the Company (i) increased its working interest in three existing oil and gas leases in Miami and Franklin Counties in Eastern Kansas, and (ii) acquired a working interest in four new oil and gas leases in the same region, comprising approximately 660 acres of property.

These consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company had a net comprehensive loss of \$557,955, and \$2,405,994 for the three months ended March 31, 2017 and 2016, respectively. The Company has accumulated a stockholders’ deficit of \$2,582,576 as of March 31, 2017. These conditions raise substantial doubt about the Company’s ability to continue as a going concern. The Company’s ability to continue as a going concern is dependent upon its ability to generate future profitable operations and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. Management has no formal plan in place to address this concern but considers that the Company will be able to obtain additional funds by equity financing and/or related party advances; however, there is no assurance of additional funding being available. These consolidated financial statements do not include any adjustments to the recorded assets or liabilities that might be necessary should the Company have to curtail operations or be unable to continue in existence.

Note 2 Summary of Significant Accounting Policies

a) Basis of Presentation

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) and the rules of the Securities and Exchange Commission (“SEC”) and should be read in conjunction with the audited financial statements and notes thereto contained in Viking’s latest Annual Report filed with the SEC on Form 10-K. In the opinion of management, all adjustments, consisting of normal recurring adjustments (unless otherwise indicated), necessary for a fair presentation of the financial position and the results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements.

[Table of Contents](#)

b) Basis of Consolidation

The financial statements presented herein reflect the consolidated financial results of the Company and its wholly owned subsidiaries, Viking Oil & Gas (Canada) ULC, a Canadian corporation formed on March 8, 2016, to provide a base of operations for properties in Canada, and Mid-Con Petroleum, LLC, formed on August 30, 2016, to provide a base of operations for properties in the Central United States. All significant intercompany transactions and balances have been eliminated upon consolidation.

c) Use of Estimates in the Preparation of Financial Statements

The preparation of consolidated financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts and timing of revenues and expenses, the reported amounts and classification of assets and liabilities, and disclosure of contingent assets and liabilities. The Company's actual results could vary materially from management's estimates and assumptions. Significant areas requiring the use of management estimates relate to the determination of expected tax rates for future income tax recoveries, stock-based compensation, embedded derivative liabilities, asset retirement obligations and impairment of long-lived assets.

The estimates of proved, probable and possible oil and gas reserves are used as significant inputs in determining the depletion of oil and gas properties and the impairment of proved and unproved oil and gas properties. There are numerous uncertainties inherent in the estimation of quantities of proved, probable and possible reserves and in the projection of future rates of production and the timing of development expenditures. Similarly, evaluations for impairment of proved and unproved oil and gas properties are subject to numerous uncertainties including, among others, estimates of future recoverable reserves and commodity price outlooks.

Actual results could differ from the estimates and assumptions utilized.

d) Financial Instruments

ASC Topic 820-10, "Fair Value Measurement" requires disclosure of the fair value of financial instruments held by the Company. ASC Topic 820-10, defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for other receivable – related party, accrued expenses and other current liabilities, accounts payable, derivative liabilities, amount due to directors, and convertible notes each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

- Level 1: inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2: inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3: inputs to the valuation methodology are unobservable and significant to the fair value measurement.

[Table of Contents](#)

Assets and liabilities measured at fair value as of March 31, 2017 are classified below based on the three fair value hierarchy described above:

Description	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Gains (Losses)
Financial Assets				
Long term investment	\$ -	\$ -	\$ -	\$ 1,446

	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 771,493</u>	<u>\$ 269,109</u>

Assets and liabilities measured at fair value as of December 31, 2016 are classified below based on the three fair value hierarchy described above:

Description	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Gains (Losses)
Financial Assets				
Long term investment	\$ 106,930	\$ -	\$ -	\$ 156,978
	<u>\$ 106,930</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 156,978</u>
Financial liabilities				
Derivative liabilities	\$ -	\$ -	\$ 1,075,833	\$ 265,448
Commodity Derivative	-	61,061	-	(61,061)
	<u>\$ -</u>	<u>\$ 61,061</u>	<u>\$ 1,075,833</u>	<u>\$ 204,387</u>

The Company's long term investment consisted of 1,437,500 common shares of Tanager Energy Inc., as of December 31, 2016, which is traded on the TSX Venture Exchange (Toronto Stock Exchange). During the three months ended March 31, 2017, the Company sold these shares. The change in the fair value of this investment that has been recognized as an unrealized gain in other comprehensive income on the statement of operations and comprehensive loss was \$1,446 for the three months ended March 31, 2017, and \$(7,265) for the three months ended March 31, 2016.

The Company had commodity financial derivatives in place at March 31, 2017. The Company does not designate its commodities derivative instruments as hedges and therefore does not apply hedge accounting. Changes in fair value of derivative instruments subsequent to the initial measurement are recorded as change in fair value on derivative liability, in other income (expense). The estimated fair value amounts of the Company's commodity derivative instruments have been determined at discrete points in time based on relevant market information which resulted in the Company classifying such derivatives as Level 2. Although the Company's commodity derivative instruments are valued using public indices, the instruments themselves are traded with unrelated counterparties and are not openly traded on an exchange.

Table of Contents

The Company uses the Black-Scholes model to value its derivative liabilities. This model takes into account inputs such as contract terms, including maturity and market parameters, including assumptions associated with interest rates, volatility and credit worthiness. The embedded derivative assets and liabilities of the Company were \$5,843 and \$771,493 as of March 31, 2017, and \$0 and \$1,075,833 as of December 31, 2016, respectively. The change in the fair value of the derivative assets and liabilities for the three months ended March 31, 2017 consisted of an increase of \$66,904 associated with commodity derivatives, a decrease in derivative liabilities of \$304,341 associated with warrants and the conversion features of convertible debt, and a reduction of \$35,232 associated with the satisfaction of certain convertible debt and a gain recognized in the statement of operations and comprehensive loss in the amount of \$336,013.

e) Cash and Cash Equivalents

Cash and cash equivalents include cash in banks and highly liquid investment securities that have original maturities of three months or less. At March 31, 2017 and December 31, 2016, the Company does not have any cash deposits in excess of FDIC insured limits.

f) Accounts receivable

Accounts receivable consist of oil and gas receivables. The Company has classified these as short-term assets in the balance sheet because the Company expects repayment or recovery within the next 12 months. The Company evaluates these accounts receivable for collectability and, when necessary, records allowances for expected unrecoverable amounts. The Company deems all accounts receivable to be collectable, and has not recorded any allowance for doubtful accounts.

g) Prepaid equity based compensation

Prepaid equity-based expenses represent amounts paid in advance through the issuance of restricted shares of stock, for future contractual benefits to be received. These expenses paid in advance are recorded as prepaid equity-based compensation as a component of "Stockholders' Deficit" and then amortized to the statements of operations and comprehensive loss over the life of the contract using the straight-line method. At March 31, 2017 and December 31, 2016, the balances of the prepaid equity-based compensation were comprised of the following:

	March 31, 2017	December 31, 2016
In March 2016, three one-year consulting agreements with three unrelated parties for services related to the petroleum industry for a combined total amount of \$800,000.	-	35,068
In January 2017, a six-month consulting agreement for services related to marketing and promotion of the Company on various platforms associated with the petroleum industry and the financial markets for a total amount of \$660,000.	364,641	-
In February 2017, a one-year consulting agreement for services related to investor relations, market exposure and content development for a total amount of \$44,160.	39,683	-
	<u>\$ 404,324</u>	<u>\$ 35,068</u>

h) Oil and Gas Properties

The Company uses the full cost method of accounting for its investment in oil and natural gas properties. Under this method of accounting, all costs associated with acquisition, exploration and development of oil and gas reserves, including directly related overhead costs, are capitalized. General and administrative costs related to production and general overhead are expensed as incurred.

All capitalized costs of oil and gas properties, including the estimated future costs to develop proved reserves, are amortized on the unit of production method using estimates of proved reserves. Disposition of oil and gas properties are accounted for as a reduction of capitalized costs, with no gain or loss recognized unless such adjustment would significantly alter the relationship between capitalized costs and proved reserves of oil and gas, in which case the gain or loss is recognized in operations. Unproved properties and major development projects are not amortized until proved reserves associated with the projects can be determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the amount of the impairment is included in loss from continuing operations before income taxes and the adjusted carrying amount of the unproved properties is amortized on the unit-of-production method.

[Table of Contents](#)

Depreciation, depletion and amortization expense utilizing the unit-of-production method for the Company's oil and gas properties for the three months ended March 31, 2017 and 2016 were as follows:

Cost Center	Oil and Gas Properties by Geographical Cost Center	
	Three months ended, March 31,	
	2017	2016
Canada	\$ 17,007	\$ 2,064
United States	34,275	18,302
	<u>\$ 51,282</u>	<u>\$ 20,366</u>

i) Limitation on Capitalized Costs

Under the full-cost method of accounting, we are required, at the end of each reporting date, to perform a test to determine the limit on the book value of our oil and natural gas properties (the "Ceiling" test). If the capitalized costs of our oil and natural gas properties, net of accumulated amortization and related deferred income taxes, exceed the Ceiling, this excess or impairment is charged to expense. The expense may not be reversed in future periods, even though higher oil and natural gas prices may subsequently increase the Ceiling. The Ceiling is defined as the sum of:

- (a) the present value, discounted at 10 percent, and assuming continuation of existing economic conditions, of 1) estimated future gross revenues from proved reserves, which is computed using oil and natural gas prices determined as the unweighted arithmetic average of the first-day-of-the-month price for each month within the 12-month hedging arrangements pursuant to SAB 103, less 2) estimated future expenditures (based on current costs) to be incurred in developing and producing the proved reserves, plus
- (b) the cost of properties not being amortized; plus
- (c) the lower of cost or estimated fair value of unproven properties included in the costs being amortized, net of
- (d) the related tax effects related to the difference between the book and tax basis of our oil and natural gas properties.

j) Oil and Gas Reserves

Reserve engineering is a subjective process that is dependent upon the quality of available data and the interpretation thereof, including evaluations and extrapolations of well flow rates and reservoir pressure. Estimates by different engineers often vary sometimes significantly. In addition, physical factors such as the results of drilling, testing and production subsequent to the date of an estimate, as well as economic factors such as changes in product prices, may justify revision of such estimates. Because proved reserves are required to be estimated using recent prices of the evaluation, estimated reserve quantities can be significantly impacted by changes in product prices.

k) Loss per Share

Basic net loss per share is computed by dividing the net loss by the weighted-average number of common shares outstanding during the period. Diluted net loss per share is computed by dividing the net loss by the weighted-average number of common shares and, adjusted by any effects of warrants and options outstanding, if dilutive, that may add to the number of common shares during the period. At March 31, 2017 and 2016, there were 6,582,259 and 6,059,537 common stock equivalents respectively, that were anti-dilutive and were not included in the calculation.

l) Revenue Recognition

All revenue is recognized when persuasive evidence of an arrangement exists, the service or sale is complete, the price is fixed or determinable and collectability is reasonably assured. Revenue is derived from the sale of crude oil and natural gas. Revenue from crude oil and natural gas sales is recognized when the product is delivered to the purchaser and collectability is reasonably assured. The Company follows the "sales method" of accounting for oil and natural gas revenue, so it recognizes revenue on all natural gas or crude oil sold to purchasers.

m) Comprehensive Loss

FASB ASC 220 "Comprehensive Income," establishes standards for the reporting and presentation of comprehensive income and its components in the consolidated financial statements. For the three months ended March 31, 2017 and 2016, comprehensive income (loss) was \$1,446 and \$(7,265) respectively, and consisted primarily of unrealized gains and (losses) on available for sale securities.

n) Income Taxes

The Company accounts for income taxes under FASB Codification Topic 740-10-25 ("ASC 740-10-25"). Under ASC

740-10-25, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under ASC 740-10-25, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company provides a valuation allowance for deferred tax assets for which it does not consider realization of such assets likely. The Company did not incur any material impact to its financial condition or results of operations due to the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Company is subject to U.S federal jurisdiction income tax examinations for the tax years 2007 through 2016. In addition, the Company is subject to state and local income tax examinations for the tax years 2007 through 2016.

o) Stock-Based Compensation

The Company may issue stock options to employees and stock options or warrants to non-employees in non-capital raising transactions for services and for financing costs. In accordance with guidance in ASC Topic 718, the cost of stock options and warrants issued to employees and non-employees is measured on the grant date based on the fair value. The fair value is determined using the Black-Scholes option pricing model. The resulting amount is charged to expense on the straight-line basis over the period in which the Company expects to receive the benefit, which is generally the vesting period.

The fair value of stock warrants was determined at the date of grant using the Black-Scholes option pricing model. The Black-Scholes option model requires management to make various estimates and assumptions, including expected term, expected volatility, risk-free rate, and dividend yield. The expected term represents the period of time that stock-based compensation awards granted are expected to be outstanding and is estimated based on considerations including the vesting period, contractual term and anticipated employee exercise patterns. Expected volatility is based on the historical volatility of the Company's stock. The risk-free rate is based on the U.S. Treasury yield curve in relation to the contractual life of stock-based compensation instrument. The dividend yield assumption is based on historical patterns and future expectations for the Company dividends.

The following table represents stock warrant activity as of and for the three months ended March 31, 2017:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value

p) Long-term Investment

Management determines the appropriate classification of investment securities at the time of purchase. Securities are classified held-to-maturity when the Company has both the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are stated at amortized cost. Securities that are bought and held principally for the purpose of selling in the near term are classified as trading securities and reported at fair value, with unrealized gains and losses included in earnings. Securities not classified as held-to-maturity or trading are classified as available-for-sale. Available-for-sale securities are stated at fair value, the changes in the market value of available-for-sale securities, excluding other-than-temporary impairments, are reflected in Other Comprehensive Income, with the impairment losses, net of income taxes, charged to net income in the period in which it occurs.

The fair value of securities is based on quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. A decline in the market value of any available-for-sale or held-for-maturity security below cost that is deemed to be other-than-temporary results in a reduction in carrying amount to fair value.

Impairments that are considered other-than-temporary are recognized as a loss in the consolidated statements of operations and comprehensive loss. The Company considers various factors in reviewing impairments, including the length of time and extent to which fair value has been less than the Company's cost basis, the financial condition and near-term prospects of the issuer, and the Company's intent and ability to hold the investments for a period of time sufficient to allow for any anticipated recovery in market value.

As of March 31, 2017, and December 31, 2016, the Company had no trading and held-to-maturity securities.

Table of Contents

The Company's long term investment consisted of 1,437,500 common shares of Tanager Energy Inc., as of December 31, 2016, which is traded on the TSX Venture Exchange (Toronto Stock Exchange). During the three months ended March 31, 2017, the Company sold these shares. The change in the fair value of this investment, recognized as an unrealized gain in other comprehensive income on the statement of operations and comprehensive loss was \$1,446 and (\$7,265) for the three months ended March 31, 2017 and 2016, respectively.

q) Impairment of long-lived assets

In accordance with ASC 360, "Accounting for the Impairment or Disposal of Long-Lived Assets", the Company is required to review its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable through the estimated undiscounted cash flows expected to result from the use and eventual disposition of the assets. Whenever any such impairment exists, an impairment loss will be recognized for the amount by which the carrying value exceeds the fair value.

Assets are grouped and evaluated at the lowest level for their identifiable cash flows that are largely independent of the cash flows of other groups of assets. The Company considers historical performance and future estimated results in its evaluation of potential impairment and then compares the carrying amount of the asset to the future estimated cash flows expected to result from the use of the asset. If the carrying amount of the asset exceeds estimated expected undiscounted future cash flows, the Company measures the amount of impairment by comparing the carrying amount of the asset to its fair value. The estimation of fair value is generally determined by using the asset's expected future discounted cash flows or market value. The Company estimates fair value of the assets based on certain assumptions such as budgets, internal projections, and other available information as considered necessary. There is no impairment of long-lived assets during the three months ended March 31, 2017 and 2016.

r) Foreign Currency Exchange

An entity's functional currency is the currency of the primary economic environment in which it operates, normally that is the currency of the environment in which the entity primarily generates and expends cash. Management's judgment is essential to determine the functional currency by assessing various indicators, such as cash flows, sales price and market, expenses, financing and inter-company transactions and arrangements. The functional currency of the parent company is the U.S. Dollar. The reporting currency of the Company is the U.S. Dollar. The Company has oil and gas operations in Alberta, Canada in which the Canadian Dollar ("CAD" or "CS" herein) is the primary economic environment. The reporting currency of these consolidated financial statements is the U.S. Dollar.

For financial reporting purposes, the operational results of the Company's oil and gas operations in Canada are prepared using the CAD, and are translated into the Company's reporting currency, the U.S. Dollar. Revenue and expenses applicable to the oil and gas operations in Alberta, Canada are translated using average rates prevailing during each reporting period. Gains or losses resulting from the settlement of foreign currency transactions are recorded as a separate component of accumulated other comprehensive loss in stockholders' deficit when realized. There have been no settlement transactions that resulted in the recognition of a foreign currency exchange gain or loss during the three months ended March 31, 2017 and 2016.

s) Convertible Notes Payable

The Company accounts for conversion options embedded in convertible notes in accordance with ASC 815. ASC 815 generally requires companies to bifurcate conversion options embedded in convertible notes from their host instruments and to account for them as free standing derivative financial instruments.

The Company has evaluated the terms and conditions of its convertible notes under the guidance of ASC 815. The conversion feature did not meet the definition of "indexed to a company's own stock" provided for in ASC 815 due to the down round protection feature. Therefore, the conversion feature requires bifurcation and liability classification. Additionally, the default put requires bifurcation because it is indexed to risks that are not associated with credit or interest risk. As a result, the compound embedded derivative comprises of (i) the embedded conversion feature and (i) the default put. Rather than bifurcating and recording the compound embedded derivative as a derivative liability, the Company elected to initially and subsequently measure the convertible note in its entirety at fair value, with changes in fair value recognized in earnings in accordance with ASC 815-15-25-4.

[Table of Contents](#)

t) Derivative Liability

We review the terms of convertible debt issues to determine whether there are embedded derivative instruments, including embedded conversion options, which are required to be bifurcated and accounted for separately as derivative financial instruments. In circumstances where the host instrument contains more than one embedded derivative instrument, including the conversion option, that is required to be bifurcated, the bifurcated derivative instruments are accounted for as a single, compound derivative instrument

Bifurcated embedded derivatives are initially recorded at fair value and are then revalued at each reporting date with changes in the fair value reported as non-operating income or expense. When the equity or convertible debt instruments contain embedded derivative instruments that are to be bifurcated and accounted for as liabilities, the total proceeds received are first allocated to the fair value of all the bifurcated derivative instruments. The remaining proceeds, if any, are then allocated to the host instruments themselves, usually resulting in those instruments being recorded at a discount from their face value. The discount from the face value of the convertible debt, together with the stated interest on the instrument, is amortized over the life of the instrument through periodic charges to interest expense.

u) Accounting for Asset Retirement Obligations

Asset retirement obligations (“ARO”) primarily represent the estimated present value of the amount the Company will incur to plug, abandon and remediate its producing properties at the projected end of their productive lives, in accordance with applicable federal, state and local laws. The Company determined its ARO by calculating the present value of estimated cash flows related to the obligation. The retirement obligation is recorded as a liability at its estimated present value as of the obligation’s inception, with an offsetting increase to proved properties.

The following table describes the changes in the Company’s asset retirement obligations for the three months ended March 31, 2017 and the year ended December 31, 2016:

	Three months ended March 31, 2017	Year ended December 31, 2016

Oil and gas purchases	-	393,808

v) Recent Accounting Pronouncements

During the quarter ended March 31, 2017, there were several new accounting pronouncements issued by the Financial Accounting Standards Board. Each of these pronouncements, as applicable, has been or will be adopted by the Company. Management does not believe the adoption of any of these accounting pronouncements has had or will have a material impact on the Company’s consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). This standard provides a single set of guidelines for revenue recognition to be used across all industries and requires additional disclosures. It is effective for annual and interim reporting periods beginning after December 15, 2017. This standard permits early adoption and permits the use of either the retrospective or cumulative effect transition method. We are currently evaluating the potential impact of this standard on our financial position and results of operations, as well as our selected transition method. Based on our preliminary assessment, we believe the new standard will not have a material impact on our financial position and results of operations, as we do not expect to change the manner or timing of recognizing revenue on a majority of our revenue transactions.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). This standard requires all leases that have a term of over 12 months to be recognized on the balance sheet with the liability for lease payments and the corresponding right-of-use asset initially measured at the present value of amounts expected to be paid over the term. Recognition of the costs of these leases on the income statement will be dependent upon their classification as either an operating or a financing lease. Costs of an operating lease will continue to be recognized as a single operating expense on a straight-line basis over the lease term. Costs for a financing lease will be disaggregated and recognized as both an operating expense (for the amortization of the right-of-use asset) and interest expense (for interest on the lease liability). This standard will be effective for our interim and annual periods beginning January 1, 2019, and must be applied on a modified retrospective basis to leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. We are currently evaluating the timing of adoption and the potential impact of this standard on our financial position, but we do not expect it to have a material impact on our results of operations.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This document includes “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 or the Reform Act. All statements other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including, but not limited to, any projections of earning, revenue or other financial items; any statements of the plans, strategies and objectives of management for future operations; any statements concerning proposed new services or developments; any statements regarding future economic conditions of performance; and statements of belief; and any statements of assumptions underlying any of the foregoing. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following: our ability to raise capital and the terms thereof; ability to gain an adequate player base to generate the expected revenue; competition with established gaming websites; adverse changes in government regulations or policies; and other factors referenced in this Form 10-Q.

The use in this Form 10-Q of such words as “believes”, “plans”, “anticipates”, “expects”, “intends”, and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. These forward-looking statements present the Company’s estimates and assumptions only as of the date of this Report. Except for the Company’s ongoing obligation to disclose material information as required by the federal securities laws, the Company does not intend, and undertakes no obligation, to update any forward-looking statements.

Although the Company believes that the expectations reflected in any of the forward-looking statements are reasonable, actual results could differ materially from those projected or assumed or any of the Company’s forward-looking statements. The Company’s future financial condition and results of operations, as well as any forward-looking statements, are subject to change and inherent risks and uncertainties.

PLAN OF OPERATIONS

Overview

The Company’s business plan is to engage in the acquisition, exploration, development and production of oil and natural gas properties, both individually and through collaborative partnerships with other companies in this field of endeavor. On March 8, 2016, the Company incorporated a wholly owned subsidiary, Viking Oil & Gas (Canada) ULC, in Alberta, Canada, to hold its Canadian oil and gas interests. In November of 2014, the Company entered into its first contract relative to oil and gas activities involving jointly controlled assets and related liabilities by purchasing an undivided 50% interest in the Joffre project located in Alberta, Canada. On February 23, 2016, the Company closed on the acquisition of working interests in four leases with access to the mineral rights (oil and gas) concerning approximately 281 acres of property in Miami and Franklin Counties in eastern Kansas. On August 30, 2016, the Company incorporated an additional wholly owned subsidiary, Mid-Con Petroleum, LLC (“Mid-Con”), in the State of Kansas to hold its current acquisitions in the central United States. On October 4, 2016, the Company, through Mid-Con, completed an acquisition whereby the Company (i) increased its working interest in three existing oil and gas leases in Miami and Franklin Counties in Eastern Kansas, and (ii) acquired a working interest in four new oil and gas leases in the same region, comprising approximately 660 acres of property.

Going Concern Qualification

The Company's ability to continue as a going concern is dependent upon its ability to generate future profitable operations and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. Management has no formal plan in place to address this concern but considers that the Company will be able to obtain additional funds by equity financing and/or related party advances; however there is no assurance of additional funding being available.

RESULTS OF CONTINUING OPERATIONS

The following discussion of the financial condition and results of operation of the Company for the three months ended March 31, 2017 and 2016, should be read in conjunction with the audited consolidated financial statements and the notes thereto in the Company's Form 10-K for the year ended December 31, 2016, filed with the SEC on April 17, 2017.

Liquidity and Capital Resources

As of March 31, 2017, and December 31, 2016, the Company had \$296,803 and 18,605 in cash holdings, respectively.

Three months ended March 31, 2017, compared to the three months ended March 31, 2016

Revenue

The Company had gross revenues of \$206,863 for the three months ended March 31, 2017, as compared to \$40,722 for the three months ended March 31, 2017, representing its share of revenue from its 50% working interest in the Joffre Property and the revenue being generated through the oil and gas acquisitions in the central United States.

Expenses

The Company's operating expenses increased by \$486,174 to \$838,382 for the three-month period ended March 31, 2017, from \$352,208 in the corresponding period in 2016. The increase is mainly attributable to increased lease operating costs commensurate with increased production, an increase in general and administrative expenses, and a significant increase in stock-based compensation during the three-month period ended March 31, 2017, as compared to the three-month period ended March 31, 2016.

Other income (expense)

The Company had other income (expense) of \$72,118 for the three months ended March 31, 2017, as compared to (\$2,087,243) for the three months ended March 31, 2016. This increase in other income is a result of a reduced interest expense of \$256,710 for the three months ended March 31, 2017, as compared to \$431,707 for the three months ended March 31, 2016, offset by a derivative gain of \$336,013 for the three months ended March 31, 2017, as compared to a derivative loss of \$1,655,536 for the three months ended March 31, 2016.

Net Income (Loss)

The Company incurred a net loss of \$559,401 during the three-month period ended March 31, 2017, compared with a net loss of \$2,398,729 for the three-month period ended March 31, 2017. The decrease in net loss was mainly due to the items referred to in the analysis of operating expenses and other income (expense).

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We prepare our financial statements in conformity with GAAP, which requires management to make certain estimates and assumptions and apply judgments. We base our estimates and judgments on historical experience, current trends and other factors that management believes to be important at the time the financial statements are prepared and actual results could differ from our estimates and such differences could be material. Due to the need to make estimates about the effect of matters that are inherently uncertain, materially different amounts could be reported under different conditions or using different assumptions. On a regular basis, we review our critical accounting policies and how they are applied in the preparation of our financial statements, as well as the sufficiency of the disclosures pertaining to our accounting policies in the footnotes accompanying our financial statements. Described below are the most significant policies we apply in preparing our consolidated financial statements, some of which are subject to alternative treatments under GAAP. We also describe the most significant estimates and assumptions we make in applying these policies. See "Note 2 - Summary of Significant Accounting Policies" to our consolidated financial statements.

Oil and Gas Property Accounting

The Company uses the full cost method of accounting for its investment in oil and natural gas properties. Under this method of accounting, all costs of acquisition, exploration and development of oil and natural gas properties (including such costs as leasehold acquisition costs, geological expenditures, dry hole costs, tangible and intangible development costs and direct internal costs) are capitalized as the cost of oil and natural gas properties when incurred.

The full cost method requires the Company to calculate quarterly, by cost center, a "ceiling," or limitation on the amount of properties that can be capitalized on the balance sheet. To the extent capitalized costs of oil and natural gas properties, less accumulated depletion and related deferred taxes exceed the sum of the discounted future net revenues of proved oil and natural gas reserves, the lower of cost or estimated fair value of unproved properties subject to amortization, the cost of properties not being amortized, and the related tax amounts, such excess capitalized costs are charged to expense.

Proved Reserves

Estimates of our proved reserves included in this report are prepared in accordance with U.S. SEC guidelines for reporting corporate reserves and future net revenue. The accuracy of a reserve estimate is a function of:

- i. the quality and quantity of available data;
- ii. the interpretation of that data;
- iii. the accuracy of various mandated economic assumptions; and
- iv. the judgment of the persons preparing the estimate.

[Table of Contents](#)

Our proved reserve information included in this report was predominately based on estimates. Because these estimates depend on many assumptions, all of which may substantially differ from future actual results, reserve estimates will be different from the quantities of oil and gas that are ultimately recovered. In addition, results of drilling, testing and production after the date of an estimate may justify material revisions to the estimate.

In accordance with SEC requirements, we based the estimated discounted future net cash flows from proved reserves on the unweighted arithmetic average of the prior 12-month commodity prices as of the first day of each of the months constituting the period and costs on the date of the estimate.

The estimates of proved reserves materially impact depreciation, depletion, amortization and accretion (“DD&A”) expense. If the estimates of proved reserves decline, the rate at which we record DD&A expense will increase, reducing future net income. Such a decline may result from lower market prices, which may make it uneconomic to drill for and produce from higher-cost fields.

Asset Retirement Obligation

Asset retirement obligations (“ARO”) primarily represent the estimated present value of the amount we will incur to plug, abandon and remediate our producing properties at the projected end of their productive lives, in accordance with applicable federal, state and local laws. We determined our ARO by calculating the present value of estimated cash flows related to the obligation. The retirement obligation is recorded as a liability at its estimated present value as of the obligation’s inception, with an offsetting increase to proved properties. Periodic accretion of discount of the estimated liability is recorded as accretion expense in the accompanying consolidated statements of operations and comprehensive income.

ARO liability is determined using significant assumptions, including current estimates of plugging and abandonment costs, annual inflation of these costs, the productive lives of wells and a risk-adjusted interest rate. Changes in any of these assumptions can result in significant revisions to the estimated ARO.

Revenues from oil and gas properties are recognized under the entitlements method of accounting, whereby revenue is recognized on the amount the Company is entitled to, based on its interest in the property after all costs associated with exploration, gathering, marketing and sales relative to the volumes of product sold.

Although these estimates are based on management’s knowledge of current events and actions the Company may undertake in the future, the final results may ultimately differ from actual results. Certain accounting policies involve significant judgments and assumptions, which have a material impact on the Company’s financial condition and results. Management believes its critical accounting policies reflect its most significant estimates and assumptions used in the presentation of the Company’s financial statements. The Company does not have off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as “special purpose entities.”

9. TIME IS OF THE ESSENCE. It is very important to the Parties that this sale is performed in a prudent and timely manner. Time is of the essence, thus all things which are required to be done by certain dates must be done, otherwise such failure shall be deemed a material default. If either party breaches this agreement the non-breaching party may elect to declare this null and void and all right of the defaulting party hereunder shall terminate. If the non-breaching party does not exercise its option to terminate this agreement, said non-breaching party may require specific performance and also exercise any other legal rights and remedies available to it, and said non-breaching party shall be entitled to recover from the breaching party its cost, expenses and attorney fees incurred in enforcing the terms of this agreement or pursuing a remedy as a result of the breach of this agreement.

If it is determined at any time prior to closing that any of the above representations is not true or that there is a substantial likelihood that any of the above representations are not true, Buyer shall have the right to cancel this Agreement. Effective Date: August 1, 2016

1. CONSIDERATION. The Parties stipulate and agree that said consideration is sufficient to support this Agreement.

2. SALE OF PROPERTY. Seller is the owner of certain working interest in and to the oil and gas leases described on Exhibit 'A' attached hereto and incorporated herein by reference (the "**Leases**"). Seller shall sell, transfer, convey and deliver to Buyer at closing, free and clear of all encumbrances, and Buyer shall purchase and acquire at closing: (a) the entire percentage of the Seller's working interest in the Leases (the "**Working Interests**"); and (b) the undivided interest in and to all oil and gas wells, equipment, fixtures and other personal property located upon the Leases and used in connection with oil and gas operations upon the Leases attributable to the Working Interests being purchased by Buyer. The property sold and to be conveyed hereby as hereinabove described may hereinafter be referred to collectively as the "**Property**."

Buyer shall purchase a portion of the Property for Thirty Thousand Three Hundred Seventy Five and 00/100 Dollars (\$30,375.00) and Seller agrees to make a capital contribution to Buyer of the remainder of the Property in exchange for One Hundred Twelve Thousand Five Hundred (112,500) shares of common stock in Buyer which are currently valued at \$0.20 per share being traded under the trading symbol VKIN (the "**Shares**").

4. ASSIGNMENT FORM. Seller shall at closing execute an Assignment Agreement and Bill of Sale conveying to Buyer the Property, including, without limitation, the stated Working Interest in and to the Leases. Such Assignment Agreement and Bill of Sale shall be in the form requested by the Buyer.

5. CLOSING. Closing shall be on or before August 1, 2016 at a time and place mutually agreeable to Buyer and Seller. This transaction shall be made effective as of 12:01 a.m. on August 1st, 2016 (the "Effective Time"). At closing Buyer shall tender the full purchase price in collected funds, and shall deliver the agreed upon common stock of Buyer to Seller and Seller shall deliver the fully executed Assignment and Bill of Sale. - b. **Due Diligence.** The Buyer shall have conducted and been satisfied with such further due diligence as Buyer deems appropriate to evaluate the viability of the purchase contemplated by this Agreement. During such due diligence process the Seller will give the Buyer and its representatives and professional advisors access to all of the Seller's properties, facilities, books, documents and records that the Buyer may reasonably request. The Buyer agrees to coordinate its due diligence with the Seller. If the purchase is not completed, upon the written request of the Seller, the Buyer will return to the Seller, or destroy, all information in the Buyer's possession derived from its due diligence activities and which was not otherwise known by the Buyer.

6. DUE DILIGENCE PERIOD. Buyer may perform any inspections or commission any studies or evaluations of the Property at Buyer's sole cost and expense as part of its due diligence prior to Closing. Such due diligence shall include but not be limited to reservoir studies, title work, surveying, or appraisal.

7. NO BUSINESS RELATIONSHIP. Nothing in this Agreement will be deemed, held, or construed to make either party a partner or associate of the other in the operation of the Leases, or to render either party liable for any debts, liabilities, or obligations incurred by the other party. It is expressly understood and agreed that the relationship between the parties hereto will always be that of vendor and vendee.

8. SELLERS RETENTION. Seller shall not terminate any operating agreements with respect to the Leases prior to the Closing. Seller shall retain all production from said operations prior to closing and shall pay all expenses and liabilities to the date of closing. All continuing services such as utilities, pumper fees and related expenses shall become on the date of closing Buyer's liability.

9. TIME IS OF THE ESSENCE. It is very important to the Parties that this sale is performed in a prudent and timely manner. Time is of the essence, thus all things which are required to be done by certain dates must be done, otherwise such failure shall be deemed a material default. If either party breaches this agreement the non-breaching party may elect to declare this null and void and all right of the defaulting party hereunder shall terminate. If the non-breaching party does not exercise its option to terminate this agreement, said non-breaching party may require specific performance and also exercise any other legal rights and remedies available to it, and said non-breaching party shall be entitled to recover from the breaching party its cost, expenses and attorney fees incurred in enforcing the terms of this agreement or pursuing a remedy as a result of the breach of this agreement.

10. POSSESSION AT CLOSING. Possession of the Property shall be on the date of closing and Seller shall have any risk of casualty loss prior to said date, and Buyer the risk of casualty loss on and after that date. a. Title. Seller owns the interest in and to the Property which is to be transferred to Buyer at closing. The title to the Property is such that upon purchase by Buyer, the title to the Property will be free of any encumbrances. The terms "action or claim" as used in this paragraph shall mean any action in tort, contract or regulatory agency claim, by any person or entity.

d. Production. Seller warrants that it is not aware of any facts or circumstances which would cause such production to decline at rates greater than normal and customary decline rates for the Working Interests, and Seller agree to provide current run tickets for all of the Leases to the Buyer within 5 business days of the execution hereof and prior to the Closing Date.

e. Brokers' Fees. Seller has not incurred any liability, contingent or otherwise, for brokers' or finders' fees relating to the transactions contemplated by this Agreement for which Buyer, any of its affiliates, or any of Buyer's interests in the Property shall have any liability.

If it is determined at any time prior to closing that any of the above representations is not true or that there is a substantial likelihood that any of the above representations are not true, Buyer shall have the right to cancel this Agreement.

13. WARRANTIES BY SELLER. In addition, Seller shall indemnify Buyer against all actual losses and damages sustained as a result of such breach of Seller's warranty. The terms of this paragraph shall survive closing and shall not merge with the assignment and bill of sale executed by Seller and delivered to Buyer at closing.

14. BUYER'S REPRESENTATIONS AND WARRANTIES. This Agreement is made and entered into based upon the belief that the following representations made by Buyer are true and will continue to be true as of the date of closing:

a. Buyer's Stock. The shares of common stock to be transferred to Seller at Closing represent unimpaired shares of common stock in and to Buyer, which are currently valued at \$0.20 per share and are traded under the trading symbol VKIN. ACKNOWLEDGEMENT & AGREEMENT

RECITALS:

- A. On or about April 14th, 2016 Viking Investments Group, Inc. (“**Viking**”) entered into a Purchase, Sale and Capital Contribution Agreement (the “**EGO Agreement**”) with Euramerica Gas & Oil Corp. (“**EGO**”), pursuant to which Viking agreed to purchase, free and clear of all encumbrances, EGO’s entire working interest in the following oil & gas leases in Eastern Kansas: (i) ABC; (ii) Wilson A; and (iii) Griffith (collectively, the “**EGO WI’s**”). In exchange for the aforementioned working interests Viking agreed to pay EGO \$460,000 in cash (the “**Cash Component**”), and issue EGO 2,400,000 common shares in the capital stock of Viking (the “**Stock Component**”).
- B. Viking’s obligations under the EGO Agreement were conditional upon Viking obtaining financing to complete the transaction.
- C. The closing date of the transaction was scheduled initially for May 15th, 2016. By mutual agreement, the parties extended the closing date to May 31st, 2016 and then to June 15th, 2016 as a result of Viking being unable to secure satisfactory financing by such dates.
- D. EGO is willing to extend the closing date to July 1st, 2016 subject to the terms of this Agreement.
- E. In the event Viking cannot pay the Cash Component to EGO on or before July 1st, 2016, Global Equity Funding, LLC (“**Global**”) and Coal Creek Energy, LLC (“**Coal Creek**”) are willing to pay the Cash Component to EGO subject to the terms of this Agreement.

AGREEMENT:

FOR VALUE RECEIVED, the parties agree as follows:

1. **Recitals.** The recitals above are true and correct and hereby form an integral part of this Agreement.
2. **Extension.** Viking and EGO hereby agree to extend the closing date of the EGO Agreement to July 1st, 2016.
3. **Closing.** In the event Viking is unable to pay the Cash Component to EGO on the Closing Date, Global and Coal Creek shall pay such amount to EGO on such date. Concurrent with and subject to such payment by Global and/or Coal Creek, Viking shall issue the Stock Component to EGO. If none of Viking, Global or Coal Creek pay the Cash Component to EGO as aforesaid, all agreements amongst any of the parties concerning the EGO WI’s shall be at an end, and EGO shall be free to sell the EGO WI’s to any other party.
4. **Title To WI’s.** If Viking pays the Cash Component along with the issue of the stocks in the name of EGO, EGO shall forthwith execute and deliver an Assignment Agreement transferring title to the EGO WI’s to Viking, or a subsidiary of Viking if so directed, free and clear of all encumbrances. If Global and/or Coal Creek pays the Cash Component to EGO, EGO shall forthwith execute and deliver an Assignment Agreement transferring title to the EGO WI’s to Global or Coal Creek, as applicable, free and clear of all encumbrances.

5. **Option to Purchase.** If Global and/or Coal Creek pay the Cash Component to EGO and Viking issues the stocks in the name of EGO, Global and Coal Creek will receive title to the EGO WI's as per sections 3 and 4 herein, the parties hereby agree as follows:
- a. Each of Global and Coal Creek hereby grant to Viking the option to purchase from Global and Coal Creek all, but not less than all, of the EGO WI's. The purchase price to be paid by Viking for the EGO WI's shall be equal to \$506,000 (the "**New EGO WI Price**").
 - b. This option granted above must be exercised by Viking within sixty (60) days from the date Global and/or Coal Creek pay the Cash Component to EGO.
 - c. Concurrent with Viking purchasing the EGO WI's from Global and Coal Creek Viking shall also purchase from Global, Global's working interest (collectively, the "**Global WI's**") in the following leases in Eastern Kansas: (i) Elam/Hahn (minimum 25% working interest); (ii) Wilson A. (East Wilson) (minimum 15% working interest); and (ii) L. Wilson (West Wilson) (minimum 12% working interest), on the terms and conditions agreed to by Global and Viking.
 - d. During the Option Period, neither Global nor Coal Creek shall sell, offer for sale or entertain any offers to sell, the EGO WI's, in whole or in part.
 - e. Upon payment by Viking of the New EGO WI price and the price to be paid by Viking to Global in connection with subparagraph 5 (c) above, Global and/or Coal Creek shall forthwith execute and deliver one or more Assignment Agreements transferring title to the EGO WI's and Global WI's to Viking, or a subsidiary of Viking if so directed, free and clear of all encumbrances.
6. **Other Documents.** The parties agree to promptly execute and deliver all such documents and take all such action reasonably necessary or appropriate to give effect to the provisions and intent of this Agreement.
7. **Enurement.** This Agreement shall be binding upon and enure to the benefit of the parties hereto and their respective successors and permitted assigns.
